# *Weekly* **MORBIDITY REPORT**

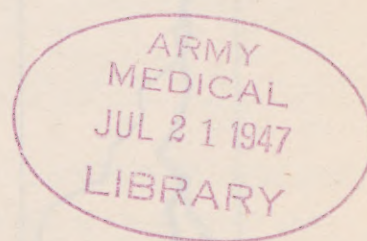

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 2 February 19 46

REPORT NO. 214

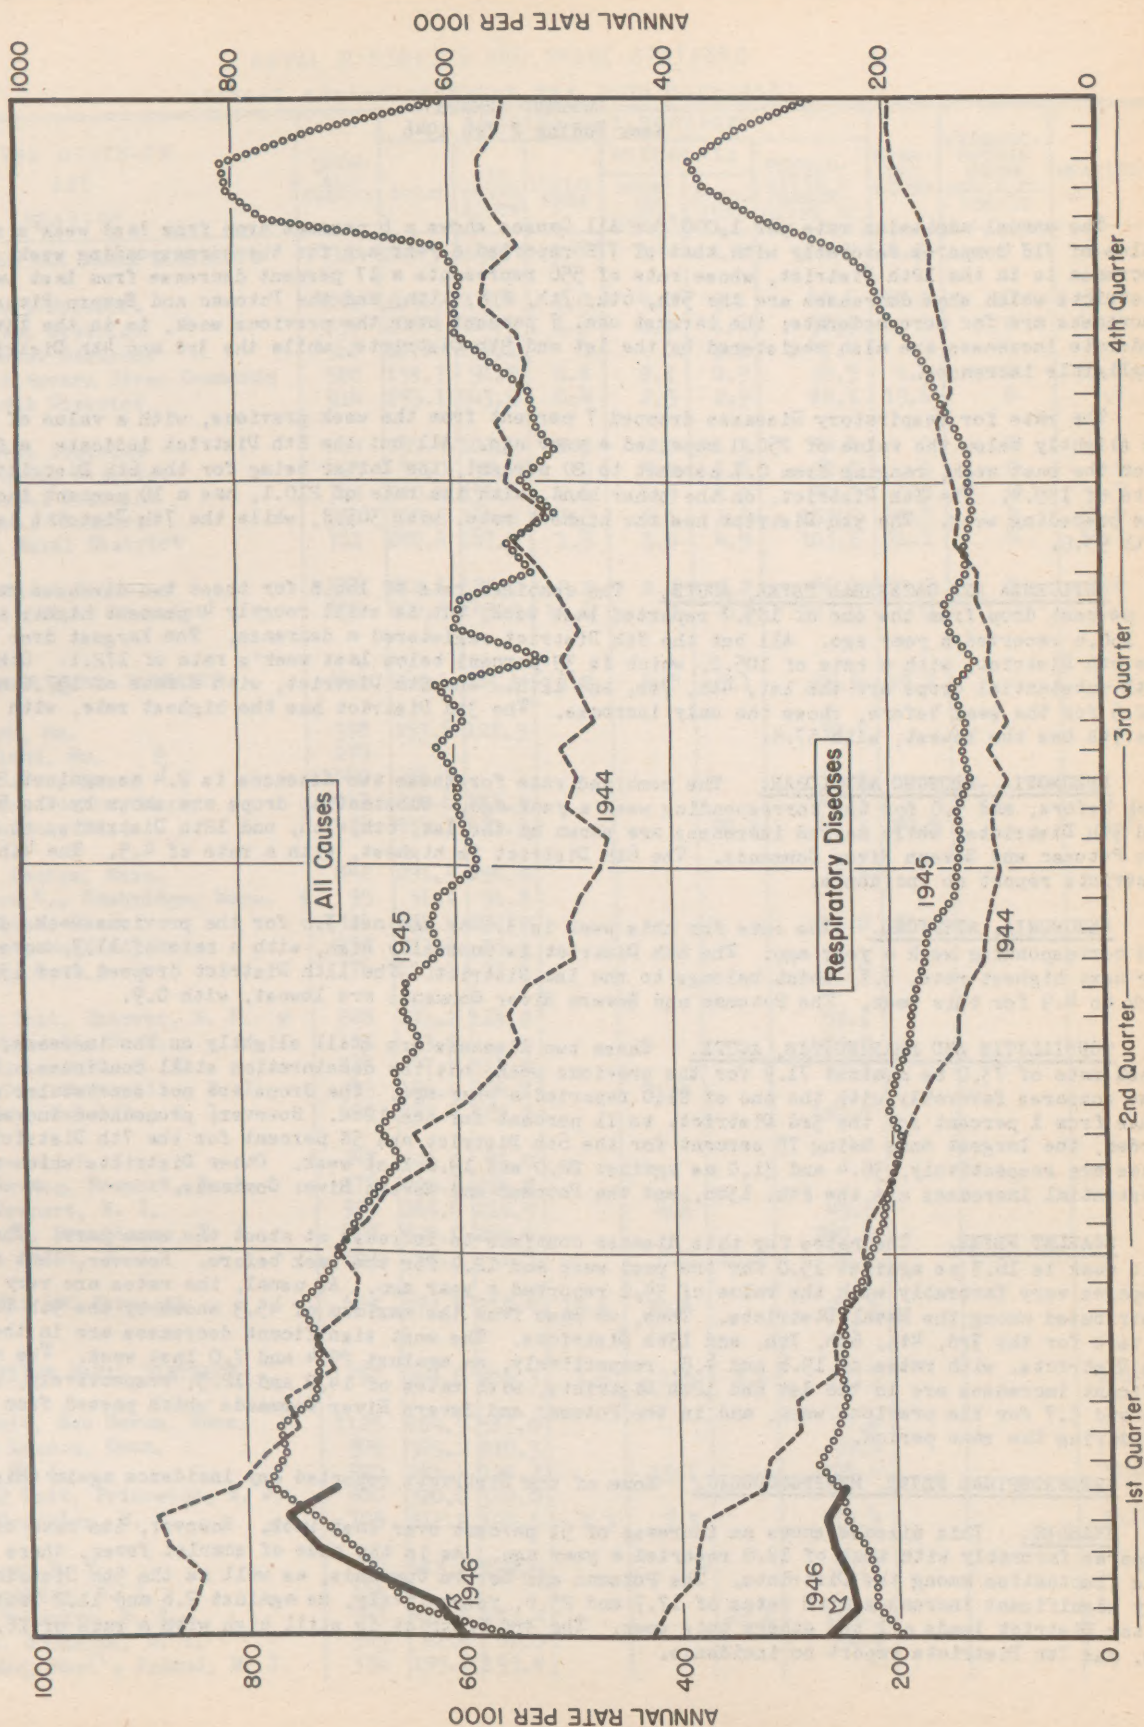

**RESTRICTED**—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

# ADMISSION RATES--ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES--1944 AND 1945

CURRENT TRENDS  
Week Ending 2 Feb 1946

The annual admission rate per 1,000 for All Causes shows a 6 percent drop from last week's rate; its value of 718 compares favorably with that of 778 reported a year ago for the corresponding week. Largest decrease is in the 12th District, whose rate of 556 represents a 17 percent decrease from last week. Other Districts which show decreases are the 5th, 6th, 7th, 8th, 11th, and the Potomac and Severn River Commands. Increases are far more moderate; the largest one, 7 percent over the previous week, is in the 13th District. Moderate increases are also registered by the 1st and 9th Districts, while the 3rd and 4th Districts have negligible increases.

The rate for Respiratory Diseases dropped 7 percent from the week previous, with a value of 245.3 which is slightly below the value of 250.0 reported a year ago. All but the 8th District indicate a decrease from the past week, ranging from 0.7 percent to 20 percent, the latter being for the 6th District, with a rate of 159.4. The 8th District, on the other hand, with its rate of 210.1, has a 10 percent increase over the preceding week. The 9th District has the highest rate, with 365.8, while the 7th District is lowest, with 93.0.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 166.8 for these two diseases represents a 10 percent drop from the one of 185.7 reported last week, but is still roughly 4 percent higher than the rate of 160.6 reported a year ago. All but the 8th District registered a decrease. The largest drop appears in the 6th District, with a rate of 105.2, which is 39 percent below last week's rate of 172.1. Other Districts with substantial drops are the 1st, 4th, 7th, and 12th. The 8th District, with a rate of 157.2 as against 142.5 for the week before, shows the only increase. The 3rd District has the highest rate, with 207.9, while the 7th has the lowest, with 57.4.

PNEUMONIA--BRONCHO AND LOBAR. The combined rate for these two diseases is 2.4 as against 2.3 for the week before, and 5.0 for the corresponding week a year ago. Substantial drops are shown by the 5th, 8th, and 9th Districts, while marked increases are shown by the 1st, 6th, 7th, and 12th Districts, as well as by the Potomac and Severn River Commands. The 6th District is highest, with a rate of 4.5. The 4th and 13th Districts report no incidence.

PNEUMONIA, ATYPICAL. The rate for this week is 3.1 as against 3.6 for the previous week, and 2.0 for the corresponding week a year ago. The 6th District is unusually high, with a rate of 11.3, more than double the next highest rate, 5.1, which belongs to the 1st District. The 11th District dropped from 13.3 for last week to 4.9 for this week. The Potomac and Severn River Commands are lowest, with 0.9.

TONSILLITIS AND PHARYNGITIS, ACUTE. These two diseases are still slightly on the increase, with a combined rate of 73.0 as against 71.9 for the previous week, but the deceleration still continues. That rate also compares favorably with the one of 81.0 reported a year ago. The drops are not spectacular as these range from 1 percent for the 3rd District, to 11 percent for the 12th. However, pronounced increases are recorded, the largest ones being 75 percent for the 6th District and 58 percent for the 7th District, whose rates are respectively, 38.4 and 31.0 as against 22.0 and 19.6 last week. Other Districts which register substantial increases are the 8th, 13th, and the Potomac and Severn River Commands.

SCARLET FEVER. The rates for this disease continue to increase at about the same pace. The rate for this week is 16.3 as against 15.0 for the past week and 12.4 for the week before. However, that rate still compares very favorably with the value of 34.0 reported a year ago. As usual, the rates are very unevenly distributed among the Naval Districts. Thus, we pass from the maximum of 45.3 shown by the 9th District, to zero for the 3rd, 4th, 6th, 7th, and 13th Districts. The most significant decreases are in the 5th and 8th Districts, with rates of 19.6 and 4.5, respectively, as against 29.4 and 7.0 last week. The most significant increases are in the 1st and 12th Districts, with rates of 14.2 and 12.3, respectively, as against 3.6 and 5.7 for the previous week, and in the Potomac and Severn River Commands which passed from 0.9 to 4.4 during the same period.

CEREBROSPINAL FEVER, MENINGOCOCCIC. None of the Districts reported any incidence again this week.

MEASLES. This disease shows an increase of 51 percent over last week. However, its rate of 9.2 still compares favorably with that of 12.0 reported a year ago. As in the case of scarlet fever, there is considerable fluctuation among the Districts. The Potomac and Severn Commands, as well as the 9th District, show very significant increases with rates of 17.7 and 25.6, respectively, as against 2.6 and 11.2 last week. The latter District leads all the others this week. The 3rd District is still high with a rate of 16.4. The 4th, 6th, and 7th Districts report no incidence.
